

IN THE CLAIMS:

1. (currently amended): A ~~kind of veneered~~ framed-up wooden doors, ~~mainly comprises~~
door, comprising stiles and rails and core panels,

wherein the stiles and rails comprise stile rail cores, edge bands and sticking profiles,

wherein the stile rail cores and the core panels are made of ordinary woods ~~wood of~~
~~ordinary trees~~ or artificial boards, the edge bands are made of high quality wood, the core panels
are made of wood of ordinary trees or artificial boards, and the outer part of the core panels are
veneered with high quality veneers, ~~characterized that the high quality wood used in the sticking~~
~~profiles is replaced with~~

wherein the sticking profiles are ordinary wood or artificial boards, and the sticking
profile is veneered with wood veneers containing high quality wood grains.

2. (currently amended): The veneered wooden doors door as described in Claim 1,
wherein the ~~stickings~~ sticking profiles and the stile rail cores are made integral, as a whole, of
~~same wood or artificial boards, and are made as a whole.~~

3. (currently amended): A method for veneering a sticking profile of a framed-up wooden
door, comprising the steps of:

applying resin glue on one side of a high-grade wood veneer, pasting ~~it on the~~ the veneer
onto an outer surface of the ~~stickings~~ sticking profile of the wooden door; then putting the
wooden door into a tamping machine having the same shape as the ~~irregular~~ surface of the

sticking profile, with the temperature adjusted to 60~120° C, and the pressure to 5~15kg/cm, applying the pressure for 2~3 minutes.

4. (currently amended): The veneered wooden ~~doors~~ door as described in Claim 1, wherein the ~~stickings~~ sticking profiles and the stile rail cores are made of different types of wood or artificial boards.

5. (new): The veneered wooden door as described in Claim 1, comprising a gap between the sticking profile and the stiles or rails.

6. (new): The veneered wooden door as described in Claim 1, wherein the sticking profiles are not attached to the stiles or the rails.

7. (new): The veneered wooden door as described in Claim 1, wherein the door is not unitary or integral.
